PROJECTS

Portfolio | *GitHub* | *Demo*
- This Portfolio Website powerfully exemplifies my profound level of expertise by delivering a interactive web experience that vividly highlights an array of skills, exceptional projects, and notable achievements.
- The outcome is an exceptionally captivating and visually eye-catching platform which showcases my work and demonstrates capabilities with the utmost professionalism.
- Harnessing the dynamic trio React, HTML, and CSS with JavaScript, it vividly underscores an exceptional proficiency in these essential technologies.

Tour Guide Portal for Domestic Tourists | *GitHub*
- This Tour Guide portal offers features like as user registration, secure and reliable login, dynamic state selection and an engaging interactive map powered by Google Maps API for precise and intuitive route finding.
- This innovative solution dramatically boosts convenience and cost-effectiveness to users to effortlessly delve into renowned destinations while conserving precious time and finances by completely eliminating the necessity for a human guide.
- Harnessing the power of HTML, CSS, MySQL, and JavaScript, the platform guarantees an effortlessly smooth and engaging user experience.

WORK EXPERIENCE

Capgemini   Bengaluru, India
Software Engineer   *Jul 2024 – Sep 2024*
- Expertly maintained and meticulously optimized a suite of applications utilizing Spring Boot and MySQL, significantly boosting backend service performance and reliability.
- Implemented full-stack solutions with MongoDB, JUnit, and React, improving system efficiency in an agile environment.
- Developed responsive UI components utilizing React, HTML and CSS to engaging user experiences.

Next Education   Noida, India
Web Developer Intern   *March 2024 – May 2024*
- During internship at Next Education, meticulously designed and seamlessly implemented innovative and dynamic report cards and certificates for the school, using HTML and CSS.
- Uploaded, meticulously organized, and dynamically managed a vast array of detailed student, staff, and school data within the innovative Learning Management System (LMS).
- Diligently managed the LMS, rigorously ensuring data integrity and pinpoint accuracy, while consistently delivering robust support and timely updates.

TCS iON   Noida, India
Web Developer Intern   *Jun 2022 – Aug 2022*
- During internship at TCS iON, developed a tour guide portal specifically for travelers with user registration and login features, state selection options by implementing map powered by the Google Maps API.
- This platform offers an exceptionally convenient and cost-effective solution for exploring renowned destinations. By reducing the necessity of human guides which optimizes user time and resources, making travel more efficient and enjoyable.
- Harnessed the power HTML, CSS, JavaScript and JSP, seamlessly integratig Google Maps API to support highly efficient route finding capabilities.
